

Macintosh

Changing Preference OS to use on MAC

The modem has been set for Windows Systems and Plug &Play is supported on the premise of Windows PC. In order to use the modem on MAC, Preference OS should be converted to Macintosh from Windows Systems as described below,

1. Preference OS of modem needs to be changed to MAC on **Windows PC**.
2. MAC Utility ("MED.exe") should be downloaded from website (www.sferia.pl) or provided CD.
3. Plug the modem and Install driver on Windows PC, see the details in the user's manual.
4. Run "MED.exe."
5. Once "MAKE STORAGE SUCCESS!" message is displayed, OS Preference has been changed to operate the modem on MAC.
6. Installing driver for MAC OS can be referred on separate MAC user's manual

Supported Macintosh Versions

1. Macintosh OS version 10.4 (Tiger)

Tiger version's driver is located in a folder [Mac Driver\MAC10.4].

2. Macintosh OS version 10.5 (Leopard)

Leopard version's driver is located in a folder [Mac Driver\MAC10.5]

3. MAC User's Manual

Located in [Mac Driver\Manual] for installation of above two drivers.
